

Girl In the Moon

Everly

The girl in the moon
Is alone with the stars
And the spaceships
The girl in the moon
Is alone and alive
With the dust and the air Nothing grows
Everything is moving
But only goes in circles
And no one to talk to
Is reason enough to be blue The girl in the moon
(We've been waiting to see)
With her dreams
(If this girl she will smile)
Has a steel melting smile
(Before she disappears)
But the girl with the blues
(You know we've been waiting here)
In the moon
(For such a long while)
Hasn't smiled in a long while Nothing grows
Everything is moving
But only goes around her
And no one to sing to
Is reason enough to be Blue, blue, blue x 4 The girl in the moon
With her dreams
Has a steel melting smile
But the girl with the blues
In the moon
Hasn't smiled in a long while Blue, blue, blue x 4 Hey moon
Hey moon We've been waiting to see
If this girl she will smile
You know we've been waiting
Here for such long while Hey moon
la, la, la, la, la, la, la, la, la
Hey moon
la, la, la, la, la, la, la, la, la, la x 2
