

How's The Weather Down There?

Local H

Take anything you want, but leave everything you need
But you better take heed, you won't get to see me bleed
I can always change, but you'll always be the same
It's such a crying shame, but someone should take the blame
An if you go home with another tough guy
I don't want to hear you cry, how you can look him in the eye
An if you go home with another tough guy
I don't want to hear you cry, theres no more of you and I
If you wanna live, if you wanna live
If you wanna live, I can help you out with that
If you wanna live, if you wanna live
If you wanna live, I can help you out with that
I know I'm being mean and I know I'm playing rough
And I know you've had it tough, but I think I've had enough
I was unaware of you ever playing fair, and I really don't care
How's the weather down there?
An' if you go home with another tough guy
I don't want to hear you cry, how you can look him in the eye?
An' if you go home with another tough guy
I don't want to hear you cry, there's no more of you and I
If you wanna live, if you wanna live
If you wanna live, I can help you out with that
If you wanna live, if you wanna live
If you wanna live, I can help you out with that
If you wanna live, if you wanna live
If you wanna live, I can help you out with that
And if you go home with another tough guy
Another tough guy who's just a little too high
And if you go home with another tough guy
I don't wanna hear you cry, there's no more of you and I
I'm up in the air, how's the weather down there?
I don't want to play fair, and I really don't care
I'm up in the air, how's the weather down there
I really don't care, I really don't care
If you wanna live, if you wanna live
If you wanna live, I can help you out with that
If you wanna live, if you wanna live
If you wanna live, I can help you out with that
If you wanna live, if you wanna live
If you wanna live, I can help you out with that
