Drone

DJ Earworm

We're finally in the future
There's a new bird in the sky
Watching from heaven
With an electronic eye
I finally got the feeling
that there's nothing I can't do
Angels can see you
I just wanna see you too.I'm gonna light the sky
Illuminate the ground
And then the game is over
Before you make a sound
So when I light the sky
You better hit the ground
I'm going super nova
Flying at the speed of soundYou'll never see my drone
But your cover is blown
You can turn off your phone
And you think you're alone
But you're not alone
You'll never see my drone
It's got a mind of its own
I'm gonna fly where it's flown
Into the great unknown
Never leave it homeFreedom feels like flying
That's why I feel so free
Free to be watching you
When you're not watching me
I used to wonder
Where on earth you wander to
Now with this laser beam
that shines from me to youI'm gonna light the sky
Illuminate the ground
And then the game is over
Before you make a sound
So when I light the sky
You better hit the ground
I'm going supernova
Flying at the speed of soundYou'll never see my drone
But your cover is blown

You can turn off your phone
And you think you're alone
But you're not alone
You'll never see my drone
It's got a mind of its own
I'm gonna fly where it's flown
Into the great unknown
Never leaving home
Till you're never aloneDon't fight fate
It's been retold
Rewritten in stars
That I remote control
When they shoot through the sky
Where angels go
Make me a wish and wave
Hello hello hello hello helloYou never say hello
It doesn't matter though
When I'm feeling alone
I am not alone
Cause I can go where it goes
Now I can know what it knows
I'm gonna fly where it's flown
Into the great unknown
Never leaving homeYou'll never see my drone
But you cover is blown
You can turn off your phone
And you think you're alone
But you're not alone
You'll never see my drone
It's got a mind of its own
I'm gonna fly where it's flown
Into the great unknown
Never leaving home
Til you're never alone
