

Red Hot

Ellegarden

Wake me up before you leave
I've got an interview today
I want a job, so don't forget
To lend me some for trainI'm growing up to be a better man
But I always fail, I'm still a dirty bug
I wanna grab the flag
But there's always someone fasterI'm trying to live a bit seriously
But what's on my mind
Is you know always girls
Vitaminize me, pass me the potato chipsYou know what
When nothing's going right
You know what
It's like a magic thingI got the music playing loud in my head
I got a red hot chili, blows it away
I got the music playing loud in my head
Turn the blinker off, we go straight aheadI'm going down like twenty times a day
It could be less or maybe the same as you
And I'm floating up
More than a million times a dayI'm trying to live a bit cautiously
But what's on my mind is always having fun
I know nicotine kills
But quitting smoking kills me nowYou know what
When nothing's going right
You know what
It's like a magic thingI got the music playing loud in my head
I got a red hot chili, blows it away
I got the music playing loud in my head
Turn the blinker off, we go straight aheadAs always things won't be better
As always no one understands
As always I'll do anything
As always, if it makes you laughI'm growing up to be a better man
But I always fail, I'm still a dirty bug
I wanna grab the flag
But there's always someone fasterI got the music playing loud in my head
I got a red hot chili, blows it away
I got the music playing loud in my head
Turn the blinker off, we are heading aheadI got the music playing loud in my head
I got a red hot chili, blows it away
I got the music playing loud in my head

Turn the blinker off, we are heading ahead
