Prepare For War

Dragonforce

I hear a distant thunder, they say, ?Bow down, surrender?
Witnessing our demise and sins of our land
Why can't we see from under? Dark reign on thou defenders
Endlessly torturing the suns without stand
Fight now, let's break the chains
So strong we must feel no pain
Forever torn apart from the haunting fields of man
Raging fear from skies above, the fire fills my veins
Destruction of humanity, the everlasting flame
Cast away, no turning back from long forgotten shores
We'll show no mercy as they fall, the fire burns inside
Now prepare for war
You feel the pain no longer, daylight, your heart grows stronger
Don't even sense the burning hunger inside
Ride out with force and valor in memory forever
Towards the battering and rise all the time
Stand now and break the chains
In unity, we feel no pain
Forever torn apart from the haunting fields of man
Raging fear from skies above, the fire fills my veins
Destruction of humanity, the everlasting flame
Cast away no turning back from long forgotten shores
We'll show no mercy as they fall the fire burns inside
Now prepare for war
Looking around there's no fear in your heart
For I know you will never surrender
Everyone here raise their eyes to the sky
Now we strike out with honor we fight
Prepare for war
Raging fear from skies above, the fire fills my veins
Destruction of humanity, the everlasting flame
Raging fears from skies above, the fire fills my veins
Destruction of humanity, the everlasting flame
Cast away, no turning back from long forgotten shores
We'll show no mercy as they fall
We'll show no mercy standing tall
Till becomes us we won't fall, the fire burns inside
Now prepare for war
War
