Walk Away

Dropkick Murphys

So you say you fell in love and you're gonna get married Somewhere it all went wrong and your plans just fell apart Raise yourself a family, how simple life can be And you aint got the heart to finish what you started The ones that you loved The ones that you left behind Are they trying to find you To fulfill your own selfish dreams, I think you might have forgotten You walked out that door to find out where you belong The ones you said You'd try to find The ones that you loved
