

# Commencement

**Elika Mahony**

We gather today, with ill invitation  
To commence here under the sun, a black congregation  
Some know me the hellion, the stranger among us  
Some know me the maged, in moments the malign Alumnus  
Throughout my tenure, my time in the mansion  
A coven arose decedents truly Urantian Now please listen close, divide your attention  
An honor presides  
The Negus has yet failed to mention  
We've altered the premise and renounced the maxims  
Low and behold the first row tears the Gog  
Alas the sky falls, rain the angels
