

Christmas Never Comes

[Cliff Richard](#)

Talk about the heart of Christmas
Talk about the reason and the rhyme
Talk about the sentimental feelings
Talk about the candlelight and wine
Talk about the children Listen to the voices singing
Listen to the laughter as they play
But listen to the whisper of a heartbeat
Whose loneliness is never far away In some hearts it's never Christmas
But it's winter all the time
All our lives spent waiting for the sun
Children of tomorrow How they need a star to follow
In some hearts it's always winter
For some hearts it seems
That Christmas never comes Don't forget the winter's children
Shadows on a star that never shines
Looking for the love that never happened
Looking for the Chris in Christmas time
The lonely voice that can't rejoice, that has no choice In some hearts it's never Christmas
But it's winter all the time
All our lives spent waiting for the sun
Children of tomorrow How they need a star to follow
In some hearts it's always winter
For some hearts it seems
That Christmas never comes In some hearts it's never Christmas
But it's winter all the time
All our lives spent waiting for the sun
Children of tomorrow How they need a star to follow
In some hearts it's always winter
For some hearts it seems
That Christmas never comes
