Love and Grace

Jah Sun

Colonialism and the policy of racism impose soul searching questions of human rights
When equally on the conscious of all men and nations of good will
History amply shows that the freedom enjoy by the many becomes fragile
With the denial even to the few of basic human rights is tolerated.
Our efforts as free men must be to establish new relationships devoid of any resentment and hostility
Restore to our belive and faith in ourselves as individuals
Dealing on the basis of equality with other equally free people

Verse 1:
Dues are being paid, sacrifices being made
The foundation laid - it's time for us to rise it up.
Through the years blood, sweat and tears,
The doubts and the fears aren't used up wise enough
To live together as a people and cheat at each other equal.
We're all the children of Jah Jah!
No more "divide and conquer" - this win expands a new way.

Chorus:
In this time and place, oh yes
There will be no more corruption no more destruction
This is what the people demand by.
We're living in a love and grace, oh yes
It's up to you and me to create reality
And this you have to overstand (understand - Iyaric)

Verse 2:
I see that time is the time for every woman and man to give all that you can give.
We got my people who choose to live simple so let others man simply live.
Remember: Every need got an ego to feed.
So take time to plant seeds, do works and good deeds
Put this message on the wear to take it.

Verse 3:
I and I we are the generation that the world has been waiting on.
But we can't sit and wait for chance to come, we have to get out and get it done.
So realise that when we rise life at all go sweet
So organise and centralise that's the only way that we are got bleed
