Sunny Places (Acoustic)

Snuff

These streets are never gonna look the same
Now the carnival's passed by
Still hear the laughter
Still see the smiles
The rhythms still pumping steadily
Life's remedy, a melody floating on
What a chance to beholdSo why wait for another dawnLet's start today
Give in, give it all
To a rhythm that's pumping steadily
Life's remedy, a melody floating on
What a chance to beholdI catch my thoughts and I pray
That love will warm your day
If life is cold and cruel
Pray love warms to youIf the seasons turn against you
The winter wind should get you down
If life is cold and cruel
Pray love warms to youThe streets are almost empty
But the rhythm echoes on
