

# Last Wish

[SOiL](#)

i spend my last days  
withering away  
don't want to end like this will you be my savior  
and do this favor  
i don't want to win like this will you just help me now this is my last wish  
let me go on to the end  
can you place to rest  
this is my last wish today is a good day  
go out my own way  
do you understand let me keep my honor  
at this late hour  
do you understand will you just help me now this is my last wish  
let me go on to the end  
can you place to rest  
this is my last wish i leave to you  
i lay my last wish onto you i leave it all to you  
i leave it all to you this is my last wish  
let me go on to the end  
can you place to rest  
this is my last wish this is my last wish  
(this is my last wish)  
let me go on to the end  
can you place to rest  
this is my last wish
