

# John Connor

## Werd (SOS)

Fucking up your machine  
Call me John Connor I slaughter your PC  
Fucking up your machine  
The one show stopper robot-a now find me [x2] Plug me right in (Matrix) the mic's in  
(Face this) I'm frightening (tasteless) with violence  
(Basic) your writing drown that with silence  
Found that sound the crown the crowd wild' in  
Shit mechanical animal  
Locked in manacles a cannibal eating up radicals  
Writing parables that's tangible with flammable words  
I've been infecting all your species since a landed on earth  
First the base drops wait stop hit them with this  
I put a blade to your wrist to remove the chip  
With a swift little shift controls I'll delete  
Escape shutdown the town I hold a key Fucking up your machine  
Call me John Connor I slaughter your PC  
Fucking up your machine  
The one show stopper robot-a now find me [x2] Sicker than bubonic plague and that's on an alright day  
Honestly I hit you with the truth I am awful mate  
I'm falling and I'm lead astray I could get the lead and spray  
But pencil lead shed light through a mental break  
Hate were we at now boy you should back down  
Jolly with a joker and I'm holding it like cards now  
How now brown cow fucking were we at clown?  
Big shoes to fill so I smile you just paint it on Fucking up your machine  
Call me John Connor I slaughter your PC  
Fucking up your machine  
The one show stopper robot-a now find me [x2] Call me John Connor (Connor)  
Call me John Connor (Connor)  
Fucking up machines  
Call me John Connor (John Connor) Fucking up your machine  
Call me John Connor I slaughter your PC  
Fucking up your machine  
The one show stopper robot-a now find me [x2]
