

Just Perfect

All

It has to be time to take you in my arms Or this one won't be real And show you how I feel It has to be here, it has to be now It has to be time to leave it all behind What a perfect time for me to make you mine I know I can make everything just perfect I know I can make everything just perfect That you're the only girl in the world for me I'm the only boy who can make you see I know I can make everything just perfect Cause when I'm with you then everything's just perfect You wouldn't have to take anything Except me with you wherever you go So throw away the weed that you don't need Show me all the things that I've never seen I know I can make everything just perfect I know I can make everything just perfect I know I can make everything just perfect Cause when I'm with you then everything's just perfect It's the perfect time to leave it all behind And put your life in place Because I can replace all the drugs you take With the smile on my face So it's yes if I can really trust you And it's no if I can only lust you I know I can make everything just perfect You can do no wrong no matter what I say I know I can make everything just perfect I can only make everything just perfect When I see you again
