

# Even If

## Benji Hughes

Doesn't seem that selfish, no, not in the least  
What's so self righteous about this curiosity?

    This want for a meager exchange

    So much time has passed but still it remains  
    This need for you is a recurring theme in my life

    Don't you think I'm lonely?

    Eager to complete the story

    Confused and still haunted

    With why you'd start over

    Oh and ignore me

    It takes time to realize the other side of you  
    That's controlled and blinding on sight of our lives

    Well even if you left me and my brother

    Even if you left us and our mother

    I want nothing more than to catch your eye

    Would you be impressed with how far I've climbed  
    Without your assistance with you nowhere in sight?

    Don't you think I'm lonely?

    Eager to complete the story

    Confused and still haunted

    With why you'd start over

    Oh and ignore us

    It takes time to realize the other side of you  
    That's controlled and blinding on sight of our lives

    Even if you left me and my brother

    Even if you left us and our mother

    She's had her share more than we'll know

    My brother won't, he just won't let go

    They say you're sick and there's a name and a phrase

    To apply and help explain

    Still having trouble trying to separate

    How you started a new family?

    Even after you left me and my brother

    Even after you left us and our mother
