

The Ghost of Love

Simply Red

Escape reality
Life's real enough
Forget mortality
It's coming soon enough
Remember her lips
Or her tender arms And don't be afraid of the ghost of love
It'll haunt you as long as you want
The ghost of love
A round of applause and a toast for love
Get most from love
With hope from above Forget about nations
They're strong enough
Next generations
They're coming soon enough
Let's do it right now
With our tender arms And don't be afraid of the ghost of love
It'll haunt you as long as you want
The ghost of love
A round of applause and a toast for love
Get most from love
With hope from above And don't be afraid of the ghost of love
It'll haunt you as long as you want
The ghost of love
A round of applause and a toast for love
Get most from love
With hope from above hope from above
Oh so much love
So so much love
Hope from above
Ghost of love
