Good Timing

Scratche

Looks like your cup's empty
And you're all alone
I got the good stuff with me
Can you hear that song?
It just came on, girlI can tell that you're feelin' it
I see the words runnin' off your lips
And you're crazy cool
Same night, same spot
Don't it look like we've got some good timing?Just a boy and a girl underneath these stars shining
It feels like it was meant to be yea
No, I don't think it's coincidence
Running into you here like this
Sparks flying, see you smiling
Baby ain't it crazy? We got... good timingLook up to that sky girl
It's a full moon night
You just broke up with somebody
Baby so did I
Just the other night, girlCan you believe what time it is?
11:11, let's make a wish
We're gonna have a night we'll never forget
And it ain't over yet
Girl we got some good timingJust a boy and a girl underneath these stars shining
It feels like it was meant to be yea
No, I don't think it's coincidence
Running into you here like this
Sparks flying, see you smiling
Baby ain't it crazy? We got... good timingIt used to be the only luck I had was a day late dollar short, always bad
And then I saw your face and it all changed up
Baby just like that
It's alright
Right on the money, on the spot
Girl we got some good timingJust a boy and a girl underneath these stars shining
It feels like it was meant to be yea
No, I don't think it's coincidence
Running into you here like this
Sparks flying, see you smiling
Baby ain't it crazy? We got... good timingGood timing
Good timing
