Vengeance Remix

Kuza

(Kill all the lies)This is the world of the dead
Death has reared himself a throne
In a strange city lying alone
Upon the stars late at night
Views himself with a heart of frightWith shattered wrists and blood soaked hands
I can't see past the lies you've told
The moments of terror that lies in the back of my head
Death has a list of victims
And I'm pushing for you to be number one
(And I'm pushing for you to be number one)Glaring across the grave yard
Inhaling the fog in the icy air of night
We are the night the immortal blood
Rip the world apartRip the world apart
(Kill all the lies, kill all the lies)
Rip the world apart
(Kill all the lies)
This is the world of the deadRip the world apart
(Kill all the lies, kill all the lies)
Rip the world apart
(Kill all the lies)
This is the world of the deadWe see that lies underneath
The calming screams of our victims puts me to sleep
Let me hear your pain and I'll show you mineBreak thy bones of the kings and queens
Tear them down from their thrones
We're never gonna be fuckedBreak thy bones of the kings and queens
Tear them down from their thrones
Were never gonna be fucked(Kill all the lies, kill all the lies)Glaring across the grave yard
Inhaling the fog in the icy air of night
We are the night the immortal blood
Rip the world apartRip the world apart
(Kill all the lies, kill all the lies)
Rip the world apart
(Kill all the lies)
This is the world of the dead(Kill all the lies, kill all the lies)This is the world of the dead
