

# Healthy Moon

## DIIV

How could i describe  
This fading dream?  
You turned and looked a way  
It goes around getting louder now  
Believe it  
Freezes love that way  
Name the song and I'll  
Just scream it  
There's a dead moon in my head  
It claws the ground both lost and found  
And fleeting  
To crash into again  
How could i describe  
A long lost dream?  
You turned and looked a way  
I've lived ten lives and had ten loves  
To remind me  
What I've been guilty of  
Say the song and I'll  
Just scream it  
There's a fucked moon in my head  
It claws the ground both lost and found  
And fleeing  
From the healthy moon
