

# Automatic

## The Mowgli's

I've tried a hundred times  
Somewhere in the back of my mind  
I knew I needed you, and you needed me, and we see it through  
We've been through everything  
Seen things you can't believe  
Now we can see the truth, and its somethin'  
that we can never lose  
Somethin' 'bout our love is automatic  
Never really know until you've had it  
Its automatic  
Its automatic  
Never really know until you've had it  
Its automatic  
I can't get enough  
Automatic love  
Some people spend their whole lives  
Lookin' for something that they won't find  
You know I believe in you  
You believe in me and we'll see it through  
I feel like theres nobody around sometimes  
Then I look at you and I realize  
As long as you're around you know that I dont mind  
Somethin' 'bout our love is automatic  
Never really know until you've had it  
Its automatic  
Its automatic  
Never really know until you've had it  
Its automatic  
Somethin' 'bout our love is automatic  
Never really know until you've had it  
Its automatic  
Its automatic  
Never really know until you've had it  
Its automatic
