

All it takes for your dreams to come true (Demo)

A Skylit Drive

Fire rages in me
Never want to see the roses on your door
Glasses separates our touch
Soaring into the unknown skies fearing what we're fighting for
This is a war we cannot win!
Our last time to make stars collide right before our eyes
Believe in everything
Everything you've ever known
Reciting words we lost
These years will never be untold
I won't be alone
Fire rages in me
Daylight fights through the night with the cries of redemption
The sun ignites the light in our eyes
And is this possible!
Our last time to make stars collide right before our eyes
Believe in everything
Everything you've ever known
Reciting words we lost
These years will never be untold
I won't be alone
This time we fight
Side by side
You and I
This time we fight
Side by side
You and I
The bringers of light
The teeth in the night
The teeth in the night
The bringers of light
The teeth in the night
I won't be, won't be alone
