

Pride

Syntax

its made up of lonely moments
there was always a moment there when i knew
you always gave installments
always knew you concentrated and grew
and i believe in reinvention
do you believe that life is holding the clue
take away all the lonely moments
give me full communication with you
your smile shine a little light, alright
don't hide, shine a little light
give up on your pride
do you believe in reinvention
do you believe that life is holding the clue
any way to face the silence
any way to face the pain that kills you
your smile shine a little light, alright
don't hide, shine a little light
give up on your pride
give up on your pride, the moment's gone
give up on your smile, life is long
so i seen a bad dream, that you were gone
i got bitten on the soul, my blood will run
give up on your pride, the moment's gone
give up on your smile, life is long
so i seen i bad dream, you were gone
you're bitter and cold, my blood will run
