

Purest One

Etro Anime

It was my weakest night between the dark and light
The look in your eyes and disturbing surprise
I could not see wrong from right But I never really was the purest one
Though I try to cleanse my soul with every sun
And I just get deeper in the same shit doesn't everyone
Close my eyes and play along Cause I am a tempted girl
This is a candied world
And it spreads like fire
And when it devours me I call the burning fun But I never really was the purist one
Though I try to cleanse my soul with every sun
And I just get deeper in the same shit doesn't everyone
Close my eyes and play along Can I hush my conscience around you
If I could take it all back
Will I lie and suffocate my impulses
I'll never leave them behind
Will I But I never really was the purest one
Though I try to cleanse my soul with every sun
And I just get deeper in the same shit doesn't everyone
Close my eyes and play along Will I fly closer to heaven
If I don't get what I want
Will you ever see the innocence you knew in me
I'll never be her again But I never really was the purest one
Though I try to cleanse my soul with every sun
And I just get deeper in the same shit doesn't everyone
Close my eyes and play along I never lied to you
