Fall

Dotan

Come out while the rain is gone
Slow down breathing on your road
And the world keeps spinning around while we dive in it
And the world is bringing us down leaving marks on our skin
Cold wind beneath our wings
Bracing out till we let it in
Don't we all fall
Don't we all fall
Chasing lights of the dying limbs
Change will come if we don't begin
Don't we all fall
Don't we all fall
Don't we all fallStone cold by the silver sea
Ripped-off, of this make believe
And we all we travel till the lights kick in
While we all keep climbing the walls chasing the marks on our skin
Cold wind beneath our wings
Bracing out till we let it in
Don't we all fall
Don't we all fall
Chasing lights of the dying limbs
Change will come if we don't begin
Don't we all fall
Don't we all fall
Don't we all fallWaling winds come sailing in
Softly as a dusty sea
Fading out a covering
Giving t' world a place in life
The arctic sun chasing in the night
Falling stars out of the sky
Don't we all fall
Don't we all fall
Don't we all fall
Don't we all fall
Don't we all fallCold wind beneath our wings
Bracing out till we let it in
Don't we all fall
Don't we all fall
Chasing lights of the dying limbs

Change will come if we don't begin
Don't we all fall
Don't we all fall
Don't we all fall
Don't we all fall
Don't we all fall
Don't we all fall
Don't we all fall
