Did I Tell You

The Spinto Band

Let me read those things for which I am thankful
My father, my mother, my family essential
The fact that theres water on top of this planet
The opportunity for me to walk in it
[Unverified]
And the ability to tell you what I want toFind me a gift that's through my closest acquaintance
That kid has so many new things
They know who this one is and I wish that they do
So I could stay with themDid I tell you I dont think this will work out
That I love you but Im wanting something else
Something close to me that I cannot forgive
Something far away that Id like to end withId like to end it with a music clich
Saying [Unverified], its not you, its me
Then I could hang up and just put you away
In some music box that the Swiss army playsSince its a holiday, Ill leave you alone
Dial these numbers and then hang up the phone
A good excuse for me to waste my [Unverified]
Because you kept me here by [Unverified]And I dont wish that you could be
So that it would stop me from asking
But lend me your ear, dearDid I tell you I dont think this will work out
That I love you but Im wanting something else
Something close to me that I cannot forgive
Something far away that Id like to end with
End with, end with, end with[Unverified] maybe, if we had met
Under different circumstances, Id forget
Let me tell you that you got me to work [Unverified]Did I tell you I dont think this will work out
That I love you but Im wanting something else
Something close to me that I cannot forgive
Something far away that Id like to end with
End with, end with
