

Make It Through

Bis

I promised that I would
The same day every week
Be guided how to be
Important we meet I'll listen as you teach
Just follow, chant and learn
Sign here you must repeat
I'm so much better They turn look round at me
Now we all look the same
Eight a.m every day
I knew I could change Will never miss a point
Counting throughout the day
It's me now that they want
I'm so much better Not all make it through you know
Not all make it through My future's guaranteed
What were you thinking of
Four years try be like me
You must regret it
