

Xerox

Diverje

I suffer for my sanity every night
But I won't know
I forgot where I come from
The record spins with the beat of a
Vague fragility of my memories
Moving on into no direction moving on, moving on
Are you there all this time
Turn this pages over again
What if I knew it all
And who killed who
Are you there all this time
Turning them pages over again
Are you there all this time
Turn the pages over again
Are you there all this time
Turn the pages over again
