

Middle Of The Night

Bearcat

Middle of the night hold on till morning
We will see the light love is spawning
Middle of the night hold on forever
We'll know when it's right all together When will we listen
When will we ever learn
Read all about it
This tide has got to turn Middle of the night hold on till morning
We will see the light love is spawning
Middle of the night hold on forever
We'll know when it's right all together Old folks and baby's
They're crying in the storm
I tried to tell them
Soon they'll be safe and warm Middle of the night hold on till morning
We will see the light love is spawning
Middle of the night hold on forever
We'll know when it's right all together Lord let us out of this hall full of mirrors
Make it all clearer don't let us fall
In the middle of the night Middle of the night new voices calling
Saying it's alright I'm not falling
Middle of the night halfway till morning
Middle of my life new days dawning Middle of the night hold on till morning
We will see the light love is spawning
Middle of the night hold on forever
We'll know when it's right all together Middle of the night new voices calling
Saying it's alright I'm not falling
Middle of the night halfway till morning
Middle of my life new days dawning Middle of the night hold on till morning
We will see the light love is spawning
Middle of the night hold on forever
We'll no when it's right all together
