# Finding My Way

## The Pipettes

I'm so glad to see you, I can't believe what I've found
You got yourself together, trying to move to a higher ground
Now what have I been missing beside from the fact that you're fine
Into your mind, and all that comes with it so many feelings to deal with
And I wanna know
Where do we go from here
Can we face our fear
Into a love again and remain friends
I believe that I wanna stay
So once again I'll be finding my way, back to you
That's just what it will be, so won't you lay right there
And create a future, build a life that we can share
That's what it's about, so do you mind hanging out
Now till forever somehow I know we'll end up together
I wanna know
Where do we go from here
Can we face our fear
Into a love again and remain friends
I believe that I wanna stay
So once again I'll be finding my way
Finding my way tell me yeah
Where do we go from here
Can we face our fear
Into a love again and remain friends
I believe that I wanna stay
So once again I'll be finding my way
I'll be finding my way, way
I'll be finding my way, way
Where do we go from here
Can we face our fear
Into a love again and remain friends
I believe that I wanna stay
So once again I'll be finding my way
Where do we go from here
Can we face our fear
Into a love again and remain friends
I believe that I wanna stay
So once again I'll be finding my way
Where do we go from here

Can we face our fear
Into a love again and remain friends
Finding my way
