Road of Life

Gentleman

You see we trodin on this road of life Disciples of the truth and we are so proud of life

This is just another episode of life

While babylon a try to crack the code of lifeYou see we trodin on this road of life

Disciples of the truth and we are so proud of life

This is just another episode of life

While babylon a try to crack the code of lifeNow we ask dem a question why dem doin it

Life is precious as it is and still dem ruin it

Now I can see that you never had a clou in it

Your goal is hopeless and still you keep pursuing it

You watch my works istead of your yours I see you viewin it

Your ways are so predicteble there s nothin new in it

The golden opportunity you have been blewin it

Free up the road and stop curfewin itYou see we trodin on this road of life

Disciples of the truth and we are so proud of life

This is just another episode of life

While babylon a try to crack the code of lifeYou see we trodin on this road of life

Disciples of the truth and we are so proud of life

This is just another episode of life

While babylon a try to crack the code of lifeTell me who will stop the fire when it s blazin

And who will calm the water when it s ragin

Only god alone cause he is so amazing

So amazing god is so amazing

Just like the wind of time keep changing

I just go with the flow cause I m not gazing

Got to keep it real cause I m not rearranging

Can t take the way how some dem behaving You see we trodin on this road of life

Disciples of the truth and we are so proud of life

This is just another episode of life

While babylon a try to crack the code of lifeYou see we trodin on this road of life

Disciples of the truth and we are so proud of life

This is just another episode of life

While babylon a try to crack the code of lifeAnd everybody born a winner watch the comany that you inna

You have to make a start so we bless up the beginner

Just like the children want dem dinner

You got to have motivation before the ice gets thinner

Who is financing the crises rising up the oil prices

Dem apple of temptation dem high tech devices

Want send the fools a little further

Think me nuh know seh microsoft and apple merge yaDon t have to wonder why dem doin it

Nor the reason they persuing it

We know seh money a dem idol

Dem nuh care about the people dem survival

Dem a grab it and go run with it

So tell me when dem ago done with it

Killing the people dem ability

And fight against dem upward mobility
