

Guitar Gangsters & Cadillac Blood

Volbeat

There's a Cadillac out in the dark
There's a guitar gangster lighting a smoke
And he feels the night and he feels the fire
Driving into the city unknown
10 small houses is what he face in the cold
And then feel the night, can you feel the fire?
Guitar gangsters and Cadillac blood
They came from the road and out of the dark
Went into a place even darker
Guitar gangsters and Cadillac blood
Walking into a place called The Bar
People looking like a ghost had arrived
And he feels the eyes, can you feel the eyes?

Guitar gangsters and Cadillac blood
They came from the road and out of the dark
Went into a place even darker
Guitar gangsters and Cadillac blood
Dear ladies, gentlemen, don't be afraid
We are here to ease your pain
Let it all start with a song
I'm sure we'll get along
Guitar gangsters and Cadillac blood
They came from the road and out of the dark
Went into a place even darker
Guitar gangsters and Cadillac blood
