Blue Sky

Hale

When do stars fade their light?
Does the moon and the sun make it right
For you the world maybe
Like an endless storm chasing a mysteryIs there hate in your heart?
Does your body drop and tell you to stop
Loving you or loving me
When it all falls down you just sing with meCoz there's a blue sky waiting tomorrow
Waiting tomorrow shining and shimmering
A blue sky waiting tomorrow
Waiting tomorrow
Maybe its all we needOh don't you wash away that smile
You just look out the window and see the light
It's beautiful to be alive
Its wonderful to live a lifeThe sun is sure to shine
For you and me for everyone
So don't be sad its just the start
Of a new beginning in your lifeCoz there's a blue sky waiting tomorrow
Waiting tomorrow shining and shimmering
A blue sky waiting tomorrow
Waiting tomorrow
Maybe its all we needRain will keep on pouring
Some things you cant control
And while the sun seems far and hard to hold
It will unfoldThere will always be a blue sky
A blue sky waiting tomorrow full of hope
yeah, full of hope yeahCoz there's a blue sky waiting tomorrow
Waiting tomorrow shining and shimmering
A blue sky waiting tomorrow
Waiting tomorrow
Maybe its all we need
