Etheriel

Lush

I know it hurts to see That in the end they sympathized with me And though it hurts to say It couldn't happen any other wayI remember when you were free No one else then you came to me Cursed you then that it couldn't last All the laughs we had in the pastAnd if it hurts you too I hope you know that I'm still fond of you And if its still unfair Remember that I thought you never caredSing to me, comfort me, turned away Someone else takes my placeAnd so you made your choice When I needed most to hear your voice But you were never there And that was when I thought you never caredI remember when you were free No one else then you came to me Cursed you then that it couldn't last All the laughs we had in the past
