

Biological

Air

Thousands of hairs
Two eyes only
Its youSome skin
Billions of genes
Again its youXX XY
That's why it's you and meYour blood is red
It's beautiful genetic loveBiological
I don't know why I feel that way with you
Biological
I need your DNAYour fingerprints
The flesh, her arm, your bones
I'd like to know
Why all these things move meLet's fuse ourselves to be as one tonight
Apart of me would like to travel in your veinsBiological
I don't know why I feel that way with you
Biological
I need your DNA
