Upside Down From Here

Atom and His Package

From Antartica to the polar caps
try to fit a big orb on a little flat map
I'm not going to drive this time
I love Greenland when it's Africa's size
North is not up
and East is not right
except for MIlwaukee Wisconsin that night
I know what it feels like to be upside down from here.
Here is my arm and it waves like a flag that reminds me than I have 2 arms and a map.
From Antartica to the polar caps
try to fit a big orb on a little flat map.
I'm not going to drive this time
I love Greenland when it's Africa's size
North is not up
and East is not right
except for Milwaukee Wisconsin that night
so get a map and learn where you live at
I know what it feels like to be upside down from here.
And if we met halfway in the middle of the planet, we'd just sit there and spin.
Would that happen? Can it!?
Here is my arm and it waves like a flag that reminds me that I have 2 arms and a map
I know what it feels like to be upside down from hereThanks to Scarlett for these lyrics
