Co-star

The Tears

Alone in my room, I switch on the tube
And wave at the screen, it stares back at me
So I turn to the sky, watch as it dries
Just waiting in here for the car to appearWhen we're together the world smiles
And when we're together it feels right
We went for the future and it seems
When where together, my co star and meYour plane is delayed
So I'll walk from the gates
But when you appear
I'll stick to your teethAnd we'll stumbled outside
And dance in the sunlight
Like ice in the sun
We'll melt into oneWhen we're together the world smiles
When we're together it feels right
We went for the future and it seems
When where together, my co star and meWhen we're together the planets align
When we're together I burn from the inside
We'll live on forever in this insanity
When where together, my co star and meDo, do, do, do
Do, do, do, do
Do, do, do, do
Do, do, do, do
Do, do, do, doWhen we're together the world smiles
And when we're together it feels right
We live for the future and it seems
When where together, my co star and meWhen where together the planets align
And when we're together the stars don't shine
We'll live on forever in this insanity
When where together, my co star and me
