## Black Fingernails, Red Wine

## Eskimo Joe

Black fingernails, red wine

I wanna make you all mine

A lot of people, underground

You wanna get there, you gotta go straight downStraight downThere's a culture, everywhere

Smoke clouds hang in the air

It's so loud, can't hear you talk

You and I, should take a walk downtownStraight down

Downtown

Straight downThe argument over God continues

In this house

All of us stand and point our fingers

At the ground

All of us stand and point our fingersStraight downRed letter day, black heart

It's gonna tear you all apart

So loud, can't hear you call

You and I are gonna fall straight downStraight down

Downtown

Straight downThe argument over God continues

In this house

All of us stand and point our fingers

At the ground

Argument over all continues

In this house

All of us stand and point our fingersStraight down

Straight down

Straight downBlack fingernails, red wine

I wanna make you all mine

A lot of people, underground

You wanna get there, you gotta go straight downThe argument over God continues

In this house

All of us stand and point our fingers

At the ground

Argument over all continues

In this house

All of us stand and point our fingersStraight down

Straight down

Straight down
