

South Side

Moby

See myself in the pouring home
See the light come over now
See myself in the pouring rain
I watch hope come over me Here we are now going to the east side
I pick up my friends and we start to ride
Ride all night we ride all day
Some may come and some may stay Here we are in the pouring home
I watch the light man fall the comb
I watch a light move across the screen
I watch the light come over me Here we are now going to the west side
Weapons in hand as we go for a ride
Some may come and some may stay
Watching out for a sunny day where there's Love and darkness and my sidearm
Hey, elan Here we are now going to the north side
I look at my friends as they start to ride
Ride at night we ride all day
Looking out for a sunny day Here we are now going to the south side
I pick up my friends and we hope we won't die
Ride at night, ride through heaven and hell Come back and feel so well
