

Made Up You

Taylor Swift

Your feet under the table
I love it when their touchin' mine
Your hands make the best kind of cradle
To tell me everything is fine All I can see is you lookin' at me
Do you know when you go
You make the sweetest sight at the window
If you had never come out of the blue
I would've stayed up
And made up you You smile just like a picture
It doesn't even need a frame
Sometimes I wait to answer
Just to hear you say my name And all I want is just what I've got
Do you know when you go
You make the sweetest sight at the window
If you have never come out of the blue
I would have stayed up
And made up you I'd never let you go
Even if I could
'Cause I never could've dreamed you
Up this good oh oh Do you know when you go
You make the sweetest sight at the window
If you have never come out of the blue
I would've stayed up
And made up you Made up you Oh oh
Made up you
