I Want to With You

David Ball

Well I guess I've been traveling light my whole life through
Thought if you never own nothing much, nothing ever owns you
Until I looked at you I swear I never gave one thought to forever
Girl, I never wanted toFind a little spread with a creek running through
Build a little dream and make it come true
But now I want to with you
Girl, I want to with youPut a little ring, third finger, left hand
Stay with somebody
Who will love and understand
Girl, I want to with youWhen a man ain't looking no telling what he may find
Until I saw the light of your love I was walking round blind
I kept running with my restless heart
Thinking that's just the way things areGirl it never crossed my mind
I think it's timeJust find a little spread with a creek running through
Build a little dream and make it come true
But now I want to with you
Girl, I want to with youPut a little ring, third finger, left hand
Stay with somebody
Who will love and understand
Girl, I want to with youI'm gonna find a little spread with a creek running through
Build a little dream and make it come true
But now I want to with you
Girl, I want to with youPut a little ring, third finger, left hand
Stay with somebody
Who will love and understand
Girl, I want to with you
