# My Last Dying Breath

## Nonpoint

Never really wanted the everyday time
Operatic over dramatic
Erase my one life left to live
A day in the life with nothing to give
But my last dying breathI'm filling my chest with my last dying breath
And this war will lay to rest
With my last dying breath
This war will lay to rest
With my last dying breathThe weight of it all, state of it all
And everything that's coming
The fate of it all rest on the chance
[?]I'm filling my chest with my last dying breath
And this war will lay to rest
With my last dying breath
One life left to live
A day in the life with nothing to give
But my last dying breath
This war will lay to rest
This world war
With my last dying breathThe weight is too much for this structure
At any moment veins will rupture
At any moment hearts will rupture
The pain is to strong to deny it
Believe me I've tried it
It caused me to die on the insideI'm filling my chest with my last dying breath
And this war will lay to rest
With my last dying breath
One life left to live
A day in the life with nothing to give
But my last dying breath
This war will lay to rest
One life left to live
A day in the life with nothing to give
But my last dying breath
With my last dying breath
I'm filling my chest with my last dying breath
With my last dying breath
