One Night

Christina Perri

I feel the way you want me
I see that you are lonely
If you couldnâ€™t know, youâ€™d leave with me
Itâ€™s more than curiosity
And I never long for winter
To your presence made me shiver
Untethered youâ€™d be better if youâ€™d only come with me

One night Iâ€™ll be the moon
Hanging over you
Spilling all over your body
Covering all your wounds
One night I will be the star
Follow where you are
Somewhere in the deep of my love
Filling your empty heart
One night, one night, one night
One night, one night, one night

Youâ€™ve come so close to tasting
Now my innocence is breaking
Like the ocean in a perfect storm
It makes me want you even more
Iâ€™ve never been so jealous
Iâ€™ve never felt so helpless
So out of breath and hungry for you

One night Iâ€™ll be the moon
Hanging over you
Spilling all over your body
Covering all your wounds
One night I will be the star
Follow where you are
Somewhere in the deep of my love
Filling your empty heart
One night, one night, one night
One night, one night, one night

Hurry, the sun is waking

Darling, donâ€™t leave me waiting

One night Iâ€™ll be the moon
Hanging over you
Spilling all over your body
Covering all your wounds
One night I will be the star
Follow where you are
Somewhere in the deep of my love
Filling your empty heart
One night, one night, one night
One night, one night, one night
