Where the Universes Are

Jimmy Webb

There's a decade in an hour
Your whole life's in a single day
And you're reaching for the moments
As the seconds slip awayAnd I see you at a party
But I'm closer to the stars
And I'm closer to the teacups
Where the universes areWhere the universes are
Where the universes are
And I stumble to my car
Sweet Lord, I'm off to find another bar
I'm off to find another barAnd I'll miss you in the island
And I'll miss you at the fair
And I'll miss a lot of places
'Cause my love, you won't be thereAnd I don't know where I'm goin'
But I know I'm goin' far
If I see you out there someday, baby
Where the universes areWhere the universes are
Where the universes are
And I stumble to my car
Sweet Lord, I'm off to find another bar
I'm off to find another bar
