

You Won't See Us

Ultimate Fakebook

Invisible sound - that's the color of our younger years
We're comin' to town - tell me are ya nervous? You
won't see us Familiar sight - she's drunk and drivin' round in circles
Held up to the light while we were out there
Out in the Nowhere You won't see us The color of our younger years - invisible suits us fine
You won't see us The color of those seventeen years, leavin' gave me quite a smile
There' nothin' to do - 'cept stay out late and cause some trouble
Might've seen a movie, but they were always PG, or PG-13
Beware the invisible ones
You sweep them into your own backyards
Beware - we're invisible - in our town
