

# Forever Is Ours

[Armin van Buuren](#)

You said that you'll open your eyes and see I've found you  
If you gave me a reason I never would've let you go  
If I were to leave a part would always stay around you  
I would catch you, I'd catch you when you fall If I could just stay a moment in your light  
I'm never afraid if I'm within your sight  
So don't you wait, hearts will call  
And always we'll run  
Time won't change, us at all  
Forever is ours again, again  
Forever is ours again, again You know we're still young  
You know we're still young I'll stay... for life If I could just stay a moment in your light  
I'm never afraid if I'm within your sight  
These are the days I'll carry all my life  
Can I just stand here in your arms for now? I'll stay... for life  
Forever is ours again  
Forever is ours again, again
