Something Goin' On Here

Aaron Pritchett

I've thought about it, I've analyzed it
You kissin' me verifies it
Ooh, there's something goin' on here
It didn't take too much insistin'
Baby you can be so convincin'
Ooh, there's something goin' on hereNo it doesn't take a genius to figure it out
We have this connection
Don't need a psychic to tell us our future's pointed in the right direction
Well take a spin, so jump on in, let's get this thing in gear
I'm really thinking
We got something goin' on hereMy friends are gettin' tired of hearin' me talk about you
Oh but honey that's all I wanna do
I go on and on and on about what's goin' on here
We're comin' pickin' up speed
A wildflower growin' from an itty bitty seed
There's something goin' on hereNo it doesn't take a genius to figure it out
We have this connection
Don't need a psychic to tell us our future's pointed in the right direction
So here we go, it's an open road, I'm seein' the sign so clear
I'm really thinkin' that we got something goin' on here
