

Welcome to the World

The Summer Set

Where is the sun?
It's been so long, this headache, these sad songs
This heartache's been sewn on your skin
What is the price that you're after?
You look up for answers
But stars are just stars and that's it.
It's on right now
Right now
You can see what you want, what you wanna be
You can be what you want, what you wanna be
Right now
Right now
You can see what you want, what you wanna be
You can be what you want, what you want...
Leave your sorrys, grab your car keys
Roll the windows down. (Welcome to the world)
Rollercoaster, cherry cola
Free-hand nowhere-bound
Welcome to the world
Welcome to the world
Welcome to the world
Welcome to the world.
Welcome to the world that we live in
A perfect collision
It's beat down, it's broken, it's bright.
Welcome to happiness, sadness
To love and to madness
The delicate balance we wrought
It's on right now
Right now
You can see what you want, what you wanna be
You can be what you want, what you wanna be
Right now
Right now
You can see what you want, what you wanna be
You can be what you want, what you want...
Leave your sorrys, grab your car keys
Roll the windows down. (Welcome to the world)
Rollercoaster, cherry cola

Free-hand nowhere-bound
Welcome to the world
Welcome to the world
Welcome to the world
Welcome to the world.
It's on right now (Right now)
The stars are just stars and that's it
It's on right now
Right now
The stars are just stars and that's it
So, leave your sorrys, grab your car keys
Roll the windows down
Oh!
Leave your sorrys, grab your car keys
Roll the windows down. (Welcome to the world)
Rollercoaster, cherry cola
Free-hand nowhere-bound
Welcome to the world
Welcome to the world
Welcome to the world
Welcome to the world.
