

One Time

Safetysuit

I used to think I deserved everything in this world there could be
Then I met you and you brought me down it was like a disease
I loved you so much that I couldn't see what you're doing to me
And now I'm left alone with you
Shoulda known better cause
One time shoulda been enough for me, fine
Guess I couldn't see through your lies
You're making me believe but then you go and do it again
This time I don't wanna hear but one line
And I don't really care if you're fine
You're making me believe but then you go and do it again
I never asked for much from you
I didn't need your stories
Cause when you'd hold me like you do
I would forget if you're lonely
And I don't need to know your faults
Don't need to know your questions too
Cause when you hold me like you do, oh, I shoulda known better cause

One time shoulda been enough for me, fine
Guess I couldn't see through your lies
You're making me believe but then you go and do it again
This time I don't wanna hear but one line
And I don't really care if you're fine
You're making me believe but then you go and do it again
Don't wanna come and ask for you
To come and love me like you should
You shoulda seen this coming for a long time, don't wanna come and ask for you
To come and love me like you should
You shoulda seen this coming for a long time, a long time
Shoulda known better cause
One time shoulda been enough for me, fine
Guess I couldn't see through your lies
You're making me believe but then you go and do it again
This time I don't wanna hear but one line
And I don't really care if you're fine
I shoulda known better then this, I Shoulda known better
