

# The City Is Lost

## Artension

Stand at the ocean and hold out your hands history's callin' your name  
questions of ages are at your command for answers is why you cameAnd now your searching for clues of a  
civilization  
buried in time victim of early demiseThe City is lost we search for Atlantis whatever the cost  
The City is lost child of the sea for eternity tossed The City is lostErotic creatures and people of science fertile  
abundant plain  
circular islands mountainous shadows exploding in fiery rainAnd now your searching for clues of a civilization  
buried in time victim of early demiseThe City is lost we search for Atlantis whatever the cost  
The City is lost child of the sea for eternity tossed The City is lostSurvivors escaping disaster sailing to far away  
lands  
brought knowledge of pyramids, physics and flight  
the proof is beneath ancient sandAnd now your searching for clues of a civilization  
buried in time victim of early demiseThe City is lost we search for Atlantis whatever the cost  
The City is lost child of the sea for eternity tossed The City is lost
