

Vision

Beatsteaks

i've been watching from behind the scene
i worry you've been given bad routine
forget the damage they have done to you
i make sure i keep an eye on you sick now - are you meant to be
broke down to disillusion street
shake now - got to hear me out
i come down this is my way out
got a vision you can live in
got a vision to be given revolving all around the cash machine
it don't work, you know what i mean
there ain't no time to count the friends you've got
there ain't no time to miss a thing you've lost sick now - are you meant to be
broke down to illusion street
shake now - got to hear me out
i come down and figure out
i keep my big black eye on you
