

# Can't Get My Act Together

[Ron Sexsmith](#)

You needed my love and I was nowhere to be found  
You're having a rough time, but I was painting the town Like to make it up to you somehow  
But things are just different now How am I supposed to help you if I can't get myself together  
How am I supposed to love you if I can't get my act together  
If I just can't help myself Wish I could make everything better again  
I know your heart aches, and yes I know I'm to blame  
There must be something in my DNA  
'Cause our love, it goes my way Like to make it up to you somehow  
But things are just different now Wish I could make everything better again  
I know your heart aches, and yes I know I'm to blame  
There must be something in my DNA  
'Cause our love, it goes my way Wish I could make everything better again  
I know your heart aches, and yes I know I'm to blame  
There must be something in my DNA  
'Cause our love, it goes my way
